The SVWRF intends to award a contract without competition because transitional costs are a significant consideration in selecting procurement. Parties who wish to obtain a copy of the procurement documents, desire additional information related to this sole source procurement, or contest it, for any reason, should contact the Issuing Procurement Unit Contact person listed above.

This sole source procurement for this work is justified to minimize cost to SVWRF using Carollo’s institutional knowledge of SVWRF’s electrical distribution system. Carollo possesses master electrical drawings; fault & coordination studies, field records, arc flash studies and other documentation of SVWRF electrical equipment acquired over the course of two decades of continuing work. This work intended to be awarded is a continuation of the assessment work identifying deficiencies noted in the capital facility plan investigation effort and that recently performed to develop the scope of work of this procurement.

The final decision for this sole source procurement will be made no earlier and no later than August 16, 2023 at 12:30 PM.
